Profile -----

Full Stack Web Developer, specialized in **backend** and **frontend integration**. Experienced in developing and optimizing applications, implementing APIs, and designing database architectures. Skilled across various environments including **WordPress, Joomla, PrestaShop, Magento, and Zend Framework**, with strong command of deployment and project management tools such as **Git, Jenkins, Hudson, Heroku, Jira, and SSH**.

Background -----

Full Stack Developer, Freelance Remote Work, Madagascar

- Design and development of complete WordPress websites, starting from mockups created in Figma.
- Creation and integration of custom plugins tailored to clients' specific needs.
- Migration and redesign of WordPress sites into modern frameworks such as Angular and Django (Python).
- Combining WordPress with imaging tools like Blender, Map, and others for enhanced visual integration.
- Optimization and database architecture to ensure performance and scalability.
- Maintenance, technical monitoring, and continuous improvement of existing websites.

Web Developer Consultant, Self-Employed, Madagascar

- Backend development with native PHP, Magento 1 & 2, Symfony 2, Ruby on Rails, PrestaShop, and SPIP CMS.
- Full Stack development using CodeIgniter, HTML, CSS, jQuery, and native JavaScript.
- Use of code management, integration, and deployment tools: Git, Jenkins, Hudson, Heroku, Jira, and SSH.

Experienced Web Developer, Freelance Remote Work, Madagascar

- Backend development with Magento 1 and Zend Framework 2.
- Frontend integration using HTML, CSS, Bootstrap, and jQuery.
- Design and management of websites built with WordPress, Joomla, and PrestaShop.
- Implementation and optimization of complete solutions combining backend and frontend.

Junior Web Developer, MADAGIL, Madagascar

- Backend development specialized in Magento 1.
- Integration and customization of Magento with OpenERP to optimize business process management.
- Implementation of an API between Magento 1 and jQuery Mobile to ensure compatibility and interaction with mobile applications.
- Design of robust and scalable solutions, combining performance with seamless system integration.

Studies -----

IT University & FPTI, Master

- **2 years of studies in electronics and microprocessors**, acquiring a solid foundation in embedded systems and hardware architecture.
- **2 years of studies in IT management**, focused on application development, database management, and information systems analysis.
